### ARTIST STATEMENT

From where comes the creative spirit? How does it manifest? It expresses itself in all aspects of our lives and each will lead in any number of directions. Where will it take you? What will it teach you? Where will you find your voice? or voices?  
Craig's life experience and creative spirit brought him back to the USA to explore new medium. The fiber series is inspired by an ordinary object and enlarged to be appreciated. Where else will the creative spirit take you?
